June 30, 2003

Sir:

The following amendments and remarks are respectfully
submitted in connection with the above-identified application.

IN THE CLAIMS:

Please amend the claims as follows:

563
B
A

7. (Amended) An organic electroluminescent material comprising a tertiary aryl amine containing 2 to 4 nitrogen atoms each forming a triarylamine, a material for an organic electroluminescent elemental device which is obtained by purifying the crude tertiary aryl amine containing as impurity compound (A) possessing one less nitrogen atom forming triarylamine and/or compound (B) possessing one more nitrogen atom forming diarylamino groups than said tertiary aryl amine and contains 1 wt% or less of compound (A) or 2 wt% or less of compound (B)
